

WhatsApp Integration with SAP

All Module Integration

Higher open rate unlike email. If your client does not answer the call, the WhatsApp message will serve as a reminder to contact later.

Grow your business profitably and creatively. Use WhatsApp as an extra sales channel

Whatsapp will help you bill more, faster and control and speed up your collection process.

It is a solid marketing tool. It is a good individual platform for direct communication. You can use to send media files of your products and

Any customer would always prefer to send you a message over WhatsApp rather than calling a helpdesk number or raising a ticket.

Your collection team will have an additional communication channel to streamline your accounts receivable process.
